Arthur C. Ringland,
Chairman,
Flood Control Coordinating Committee.

UNITED STATES DEPARTMENT OF AGRICULTURE

DIRECTOR OF EXTENSION WORK

WASHINGTON, D. C.

Circular Letter

Miscellaneous - No. 288

June 10, 1937.

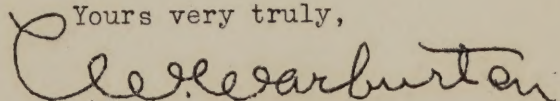

The Flood Control Act of 1936 provides that Federal investigations and improvements for flood control shall be carried out by the Secretary of War and the Secretary of Agriculture. The investigations and improvements on the waterways are to be carried on by the War Department Army Engineers, and the investigations and measures for run-off retardation and soil erosion prevention are to be carried out by the Department of Agriculture.

The Act directed the two Departments to carry on preliminary examinations and surveys on some 222 waterways and watersheds. These embrace an area of approximately one-third the continental area of the United States. Additional watersheds have been included in bills now before Congress which increase the total area considerably.

The Secretary has established an Advisory Committee on Flood Control and a Coordinating Committee to develop the plans and to coordinate the work of the Department to be conducted under the authority conferred by this Act. Field Coordinating Committees have been set up to carry on the work in the field and to cooperate with State agencies in making preliminary examinations and surveys. To further this work, the cooperation of the Directors of the State Agricultural Extension Services has been requested. The personnel of the Field Committees is given in the attached circular together with the watersheds for which they are to conduct preliminary examinations.

One of the immediate tasks of the Field Committees will be to bring together available information needed for the report for each watershed. I am sure that you will make such information as you have on the watersheds available, and will assist in determining the facts on which to base recommendations for each watershed. To avoid confusion and unnecessary duplication of contacts, I have requested that only the Chairmen of the Field Committees, or their authorized representatives, make contact with you. I have also requested that the Chairmen inform you of the nature and extent of the work in your State. These committees may wish to contact some of the county agents with reference to specific conditions in their counties. Whatever assistance you render these Committees will be appreciated.

Yours very truly,

C. W. Warburton,
Director of Extension Work.

Enclosures.
